

AD HOC ANALYTICS

LEVERAGING THE DATA IMPACT CYCLE

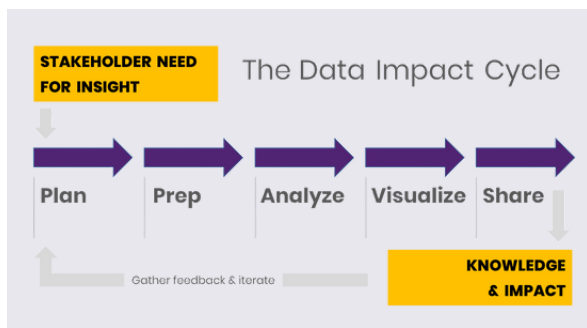

Purpose

Responding to requests for data that will inform policy and practice requires going beyond canned reports to provide specific insights and recommended actions. A flexible, dynamic analytic process is necessary!

Key Components

- Workshop series
- Applied learnings through assignments and office hours

A Good Choice If...

You want to respond to stakeholder needs flexibly and rapidly for data insights that could drive action. You need an efficient but technically effective process for analyzing and reporting out on survey data. You want an agile strategy for conducting small data integration projects. You want to track progress and short-term/quarterly outcomes based on locally defined metrics.
